

### **Decision Process for MHSW Materials with Multiple Properties**

Follow the steps below to identify the correct reporting category for products that fall under one or more of the 22 designated material categories.

#### **Section 1:**

If you have questions about the correct reporting category for Aerosol products, please review the table below and ask yourself the following questions:

<b>Questions about products in Aerosol containers</b>	<b>If yes, report under:</b>
Does it contain Paint and/or Coatings?	AEROSOLS
Does it contain Reactive materials? 1. Icosyanate foam insulation in an Aerosol 2. Icosyanate paint in an Aerosol 3. Icosyanate paint NOT in an Aerosol	1. AEROSOLS 2. AEROSOLS 3. PAINT AND COATINGS
Does it contain Solvents (e.g. lubricating solvents, DIY products etc)?	AEROSOLS
Is it an aerosol inhaler?	PHARMACEUTICALS - Medical Inhalers
All other Aerosols containing products with any other material property (e.g. Flammable or Irritant etc.)?	AEROSOLS

#### **Section 2:**

If you are a Steward of products which have a combination of properties, please refer to the table below:

<b>Material Properties</b>	<b>Reporting Category</b>
<b>LEACHATE TOXIC</b> with other material properties (e.g. Flammable etc)	Report according to other material (e.g. FLAMMABLE etc.)
<b>REACTIVE</b> with other material properties (e.g. Flammable etc)	Report according to other material (e.g. FLAMMABLE etc.)
Combination of <b>TOXIC</b> and IRRITANT	TOXIC
Combination of <b>CORROSIVE</b> with one or more properties: TOXIC and/or IRRITANT	CORROSIVE
Combination of <b>FLAMMABLE</b> with one or more properties: TOXIC and/or IRRITANT and/or CORROSIVE	FLAMMABLE
