Note (1). Fertilizers and pesticides covered by the Phase 1 definitions are almost entirely covered by the Cosmetic Pesticide Ban Act. While the costs to manage these groups of products has been estimated as per the table above, no current reliable split of sales is available for banned versus non-banned products. As such, these fees have been set as "market share". It is Stewardship Ontario's intention to move to a set fee rate for non-banned pesticides and fertilizers not containing banned pesticides as soon as reliable data on sales in to market and quantity available for collection are obtained.
